

## Ensors VAT services for Making Tax Digital

To comply with HMRC's "Making Tax Digital" (MTD) initiative many businesses and organisations will use MTD compliant accounting software. Many of these are cloud based so bring benefits such as improved accessibility, reduced IT maintenance and greater security.

However, this may not be practical for you as you may be:

- using bespoke or legacy software with no option of MTD compatibility;
- unable to upgrade your software due to its integration with other systems and, as a result, you cannot upgrade to ensure MTD compatibility; or
- currently using a spreadsheet for your accounting and it's not cost effective to change to an accounting package.

In these circumstances, you have two options.

### Ensors VAT submission service

You can let us take the strain and we will do everything for you.

We will provide you with access to our new, secure portal, OneClick. This will enable you to securely send us your VAT spreadsheet and we will then ensure a timely submission of your VAT return to HMRC.

This service will cost £40 + VAT per submission\*.

For an extra charge, we can also provide a full VAT review thus ensuring data accuracy prior to submission.

### VAT filing software

Alternatively, if you prefer to make the submissions yourself then we have teamed up with leading cloud accounting software provider Quickbooks to provide you with direct access to their new Making Tax Digital filing software.

This will cost £10 + VAT per month and will allow you to continue to use spreadsheets as it will provide a digital bridging link from your own VAT spreadsheet through to HMRC to enable the VAT submission to be filed directly.

For further details and to register for either service please speak to your usual Ensors contact. Alternatively email [marketing@ensors.co.uk](mailto:marketing@ensors.co.uk)

*\* Please note we will provide you with a standard template to use. If you are unable to adopt this or require help to do so, there may be an additional set up charge.*
