Our client portfolio includes business clients across the spectrum, but the work is likely to focus mainly on substantial owner managed businesses of £5m to £100m turnover, and on large groups with an international element. The role includes advising not just the businesses themselves, but becoming the "trusted tax advisor" to owner managers, helping them on the interaction of their business's tax position into their own tax affairs in conjunction with the personal tax team, as well as advising on larger corporate issues and assisting the Corporate Finance team on transactional tax matters.
